### 10.Inspection Methods

#### (1). Linearity Condition

Short RT and RL(or short RL and LL) and voltage DC 5V is applied, short LT and LL (or short RT and LT) and ground is applied, using stylus to draw straight points LX and LY at 5.0mm intervals within pattern area and detect the voltage at SG. To measure the voltage differences between RT and LT(or RT and RL) (Fig 10-1) (Fig 10-2)

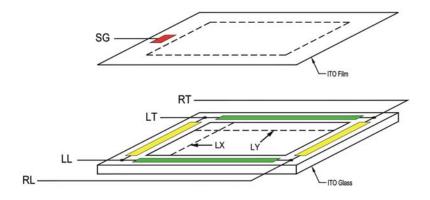

Figure 10-1

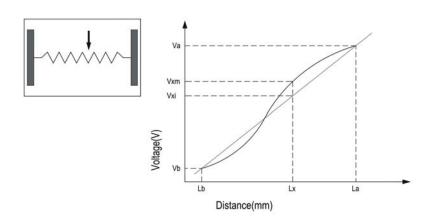

Figure 10-2

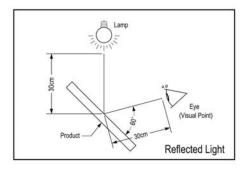

Linearity: [ | Vxm-Vxi | ] / (Va-Vb) X 100% (for reference only)

#### (2). Specification

The linearity must be meet the electrical specification outlined in item 6.

### 11. Appearance Inspection

- (1) The flaws and impurities are allowed outside viewing area except for those affecting electrical functions.
- (2) The inspection was performed with one 17W fluorescent lamp lighting from back or side. The panel was placed 30cm away from eyes. (Figure 11-1)

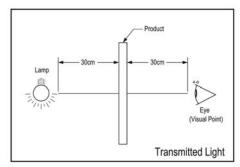

Figure 11-1

#### (3) Glass Flaw

Item	Picture	Specification
Corner Flaw	Z Y Y	$X \le 3.0 \text{mm}$ $Y \le 3.0 \text{mm}$ $Z \le T$
Edge Flaw	X Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z Z	$X \le 3.0 \text{mm}$ $Y \le 3.0 \text{mm}$ $Z \le T$
Progressive Flaw		Not allowed

Note: T=Glass thickness

#### 12. Attention of Mounting Condition

(1) The gasket support of touch panel must be designed on the outside of Viewable area, as well as to avoid pressing on touch panel accidentally, the enclosure must be designed with enough clearance to panel surface. To avoid pressing error on touch panel accidentally, please remain space between the surface of panel and the Bezel.

- (2) Bezel opening must be designed between Viewable area and Active area. Bezel opening must not touch Viewable area.
- (3) We recommend elastic material made support.
- (4) Do not use adhesive to bond top surface (ITO Film) of touch panel with enclosure.
- (5) The edge of touch panel is conductive. Don't touch it with metal after mounting.
- (6) Proper grounding of controller at all times assure normal operation.

14.Caution	
Storage	(1)Storage shall be under the temperature and humidity that mentioned in the
	specification. Do not expose the products to direct sunlight or piling caused damage
	on the surface.
Unpacking	(1)Check for the correct vertical direction of the package before unpacking.
Handing	(1) In order to prevent fingerprints or stain on the products, and get a cut by sharp
	edges of glass, clean finger sacks or glove and mask are required during
	handing.

	(2) Do not touch the viewing area of the panel.
	(3) Do not handle the tail (connector) of panel directly, when you handle the touch
	panel. It will cause the problem of combination and reliability
Cleaning	(1) Clean and soft clothes with neutral detergent and with isopropyl alcohol may be
	used for cleaning.
	(2) Do not use any chemical solvent, acidic or alkali solution.
	(3) The panel is designed with air groove. Insulation and cushioning pads should
	be designed around the edges of the panel to prevent water and dust.
Install and Assembling	(1) Excessive force or strain to the panel or tail is prohibited.
	(2) Retain at least 0.3 mm clearance between panel and display module.
	(3) Gasket or cushion pads around the edge of the panel may segregate water and/or
	dust contamination.
Operating	(1) Use a plastic stylus (tip R0.8 or over) or finger. Sharp edged or hard articles are
	prohibited.
	(2) The gathering of dew in the panel may occur with abrupt temperature or
	humidity changes. A stable environment condition is recommended.
Others	(1) Keep the surface clean. No adhesives should be applied.
	(2) Avoid high voltage and static charge.
	(3) GROOVY has the right to change the materials and specification.
